

Ask Your Database

WordPress - Ask Your Database Chatbot Integration

Welcome to **Ask Your Database (AYD)**—Welcome to Ask Your Database (AYD)—the ultimate solution for integrating customizable chatbots into your WordPress site! This guide will help you configure and use the AYD plugin to seamlessly manage chatbots and improve user interactions.

Features at a Glance

-  **Flexible Chatbot Integration:** Add up to 5 personalized chatbots to your WordPress site.
-  **API Integration:** Use your AYD API Key for secure and efficient chatbot connectivity.
-  **User Assignments:** Assign specific users to each chatbot for tailored access.
-  **Shortcodes Made Easy:** Embed chatbots anywhere on your site with simple shortcodes.

Getting Started: Step-by-Step

Step 1: Install the Plugin

1. Download the AYD Chatbot plugin ZIP file.
2. Log in to your WordPress admin dashboard.
3. Navigate to **Plugins > Add New > Upload Plugin**.
4. Select the ZIP file and click **Install Now**.
5. Click **Activate** to enable the plugin.

Step 2: Configure Global API Key

Create New API Key

Ask Your Database

Follow the steps below to configure your chatbots:

1. Enter your API Key, which can be found on your [Ask Your Database API Keys page](#).
2. Go to the [Chatbot Dashboard](#), click Integrate on the selected chatbot, and retrieve the Chatbot ID.
3. Provide a unique name and Chatbot ID for each chatbot you want to configure.
4. Assign users who can access each chatbot.
5. Save the settings and use the shortcodes displayed below to embed the chatbot into your WordPress site.

Global API Key

Set the API key to be used for all chatbots.

API Key:

Chatbot 1

Chatbot Name:

Chatbot ID:

Shortcode: `[ayd_chatbot id="mega-tread"]`

1. Go to **Chatbot Settings** from your WordPress admin menu.
2. Enter your **Global API Key**, which can be found on your [Ask Your Database API Keys page](#).

Step 3: Configure Chatbots

You can configure up to 5 chatbots:

1. Navigate to the **Chatbot Settings** page.
2. For each chatbot:
 - Enter a **Chatbot Name** (e.g., "Customer Support Bot").
 - Enter the **Chatbot ID**, which can be found on your [Chatbot Dashboard](#).
 - Assign specific users who can access this chatbot using the dropdown list.
3. Save your changes.

Step 1: Create a New Authorized Session

To initiate a new session, please call the following API from your backend to retrieve the s

```
curl --location 'https://www.askyourdatabase.com/api/chatbot/v2/session' --header 'Content-Type: application/json' --data '{"chatbotid": "2b788dff13d3073d6086469aa754d71c",
```

Step 4: Embed Chatbots with Shortcodes

1. Copy the shortcode displayed under each configured chatbot.
 - Example: `[ayd_chatbot id="customer-support-bot"]`

2. Paste the shortcode into any WordPress post, page, or widget where you want the chatbot to appear.
 3. The chatbot will render dynamically for assigned users.
-

Step 5: Test Your Chatbots

1. Visit the page or post where you embedded the chatbot shortcode.
 2. Ensure the chatbot loads correctly.
 - If not logged in, users will see an access restriction message.
 - Assigned users will be able to interact with the chatbot seamlessly.
-

🔧 Troubleshooting

Common Issues

- **Chatbot Not Displaying:**
 - Ensure the API Key and Chatbot ID are correctly entered.
 - Check that the logged-in user is assigned to the chatbot.
- **Access Restricted Message:**
 - Confirm the user is logged in and included in the assigned user list.

☀️ Need Help?

For additional support, visit the [Ask Your Database Support Center](#) or contact your site administrator.

☀️ Tips for Success

- Regularly update your API Key if security changes are made on your AYD account.
 - Use descriptive names for your chatbots to easily identify them on your site.
 - Test each chatbot's functionality before going live.
-

Thank you for choosing Ask Your Database! We're excited to help you create a more interactive WordPress experience. 🚀
